

**AD110-A10** Analog control signal: 0- 10 VDC @ 0.6 mAmps  
 Operating Voltage range: 11VDC to 24 VDC  
 Output maximum rating: **10 Amps**

**Specifications:**

- Full range dimming from a standard 1- 10 VDC dimming control signal
- 0.60 mA control input load
- Also could be locally controlled with a 100 Kohms potentiometer.
- **Positive Common ( Anode ) , dims Negative side.**
- PWM ( Pulse Width Modulation ) dimmer for constant Voltage Lights.
- Maximum outputs 10 Amps.
- Voltage range from 11 to 24 VDC.
- Dim: L= 2.80"; W= 1.40"; D= 0.60"

**Made in USA**
